

1. I have found the material to be [all new/all familiar/sometimes new and sometimes familiar]

Most material in this course has been fairly familiar. At the very least, I have used all the things we've covered in class once.

2. I have found the material to be [challenging/easy/occasionally easy and occasionally challenging]

Occasionally easy and occasionally challenging. In particular, the ggplot homework assignment was fairly difficult

3. One thing I have learned in this class that I didn't know before was [. . .]

I had never used Beamer before on Markdown, I'll probably make my presentations in Markdown now since it's much easier than using Powerpoint.

4. The most confusing thing covered so far was [. . .]

The RShiny presentation was a little confusing since it seemed kind of rushed? I would have liked to try and make an app if there is time permitting

5. One thing that's making it easy for me to learn is [. . .]

The examples in the lecture slides have been very useful. Also, the nice bits of humor are good for lightening up the topics.

6. One thing that's making it challenging for me to learn is [. . .]

The ggplot homework assignment was challenging because the instructions were a little difficult to comprehend.

7. One thing that I would like to see covered before the end of the quarter is [. . .]

Is there any way to incorporate more applications to biology in this course? It would be nice to connect the things we learned to biological applications since we are biostatistics students.
